About me

In a previous life, I was a Food Engineer in an ice cream factory in France. Now I call Manchester my home. After passing my software technician apprenticeship with Distinction, I can now call myself a Front End Developer! I am extremely enthusiastic and I love learning new technologies. I take joy in building beautiful products for amazing people.

Web Dev Projects

- Full stack projects using Laravel & Jetstream coupled with React.js, Vue.js or using Livewire and Alpine.js and Tailwind CSS to handle the style.
- Headless Shopify (Shopify CLI Development) to create fully customisable e-commerce websites.
- Static websites using React.js enhance with different packages.
- Full Stack websites using Next.js, including Nodemailer API.
- WordPress hosted and headless coupled with Next.js.

Technical Skills

Languages: JavaScript, TypeScript

Frameworks: React.js, Alpine.js, Next.js, Laravel, Vite

Style: Tailwind CSS, CSS, SASS, styled-components

CMS: Shopify, WordPress (hosted and headless)
