About me

At the start of the 2020 lockdown I started messing around with JavaScript as a time killer. A year later, I decided to begin a new career and started as an apprentice. I have been working in an agency for over a year now and have been involved in more than 10 different projects from a wide range of clients while training.

Technical Skills

Languages: JavaScript, PHP

Frameworks: React, Vue, Next.js, Laravel

Style: CSS, SASS, styled-components, Tailwind CSS

CMS: WordPress

E-commerce platform: Shopify

Deployment: Netlify, Vercel

Web Design: Adobe XD, Figma, Affinity Designer

Other: Git, NPM

Education

Apprenticeship Software Developer Technician
Level 3 - Estio

April 2021 - Present

FreeCodeCamp - 900h
May - Dec 2020

Master's Degree in Biology & Nutrition
University of Western Brittany / France
2012 - 2017

Web Dev Projects

Several **WordPress** projects for a wide range of clients (community groups, photographer), some full CMS and other hybrids project using Laravel. From design to deployment.

Plugins used: Elementor, Contact Form 7, Job Manager, Yoast

Full stack projects using **Laravel** & Jetstream projects coupled with React, Vue or using Livewire and Alpine.js and Tailwind CSS to handle the style.

Static websites using **React** enhance with different packages like Framer Motion

Full Stack websites using **Next.js**, contact form link to Ionos account through SMTP

Soft Skills

Positive attitude: I am friendly and eager to work.

Teamwork: I work effectively with my coworkers and I can accept and apply feedback from them.

Work ethic: I always try to do my best.
